We have been using this software for a few months, and it has made our entire workflow more efficient. Stock updates, sales entries, and barcode features work perfectly. Most importantly, the accuracy is outstanding. Highly recommended for any business!

Sunshie IT performed exceptionally well in creating our company (Taiji International Ltd.) website. They comprehended all our requirements flawlessly and produced a clean, modern, and fully responsive site. The communication was seamless, and the developer was consistently available for prompt revisions. They have highly professional and skilled developers; we will certainly collaborate with them again.

I have taken an offline software from Sunshine to manage our organization's stores and accounts. Initially, it seems to be a necessary and easy-to-use software for a small business organization. I hope that more new, easy-to-use and easy-to-understand software will be introduced for the prosperity of this organization.
